

BATTERY EQUALISER

**Doubles Battery Life in
Cars, Boats, Forklifts, Trucks and More!**

(800) 226-1055

SUN REP is proud to bring you another great product line:

BATTERY EQUALISER

It is the desire and the passion of the management of Battery Equaliser around the world to **use Battery Equaliser to help better our environment.**

Lead-acid batteries have changed very little in 70 years. They are cost efficient to store electric power. The down side is batteries are considered hazardous waste and are using up a natural resource, maybe there is room for improvement.

With a few ounces per battery of a liquid additive, "Battery Equaliser" the internal chemistry of all lead-acid batteries can be improved.

Dosage Formula Usage Chart

- 12 Volt Car Battery - 1/2 oz. per cell
- 12 Volt Deep Cycle Battery - 1 oz. per cell
- 6 Volt Car Battery - 1 oz. per cell
- 6 Volt Golf Cart Battery - 2 oz. per cell
- 12 Volt Large Truck Battery - 2 oz, per cell (8HD or 8D)
- 24-36-48 Volt Forklift Battery - 3 1/2 oz. per cell
- STN & 6TL Batteries - For Military Use 1 oz. per cell

ENVIRONMENTAL PROTECTION:

By using Battery Equaliser you can help reduce hazardous waste in land fills. Reduced gassing decreases the amount of dangerous airborne lead and sulfuric acid released in our environment, particularly in the work place (*a closed environment*).
