SUREHOLD®

SureHold

The Glue Authority

SUREHOLD®

What Makes SureHold Unique!

Everyone has experienced the agony of purchasing a super glue product, using it once, only to find the cap has glued itself shut, or worse, the entire tube as hard as a rock when you are ready to use it again. Basically, SUREHOLD has “*built a better mousetrap!*” SUREHOLD comes in a tube in which you control the flow – no messy glops ooze out before you are ready. The unique “Drip-Proof, Clog-Proof” design of the container allows the glue to be literally “*sucked back*” into the tube after the desired amount is used. No leftover glue in the nozzle means the cap WILL NOT glue itself shut nor will you waste glue because it continues to ooze out after you set it down. The re-usability aspect of this product allows the user to store the product and use it time and time again as fresh as the product was when purchased.

Packaging

In a recent marketing analysis conducted by GMT (General Management Technologies), shoppers were asked what influenced them most in their selection of a glue product. The response by a 93% margin indicated that shoppers like to touch the package and 96% like to read the package.

All SureHold packaging is designed with the following criteria:

- Bi-Lingual (English/Spanish) to capture that growing market.
- Easy to understand instructions.
- Money Back Guarantee.
- Color co-ordinated to attract customer attention.

Terms

- 1% Net 60 days
- Minimum order \$75.00
- Freight Prepaid to all warehouses
- Damaged goods or customer returns may be destroyed at store level

SUREHOLD®

Blister Packs

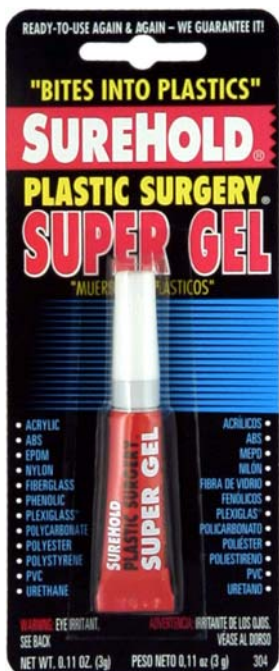

ALL AMERICAN SUPER GLUE
